Geneva 04 December 2011

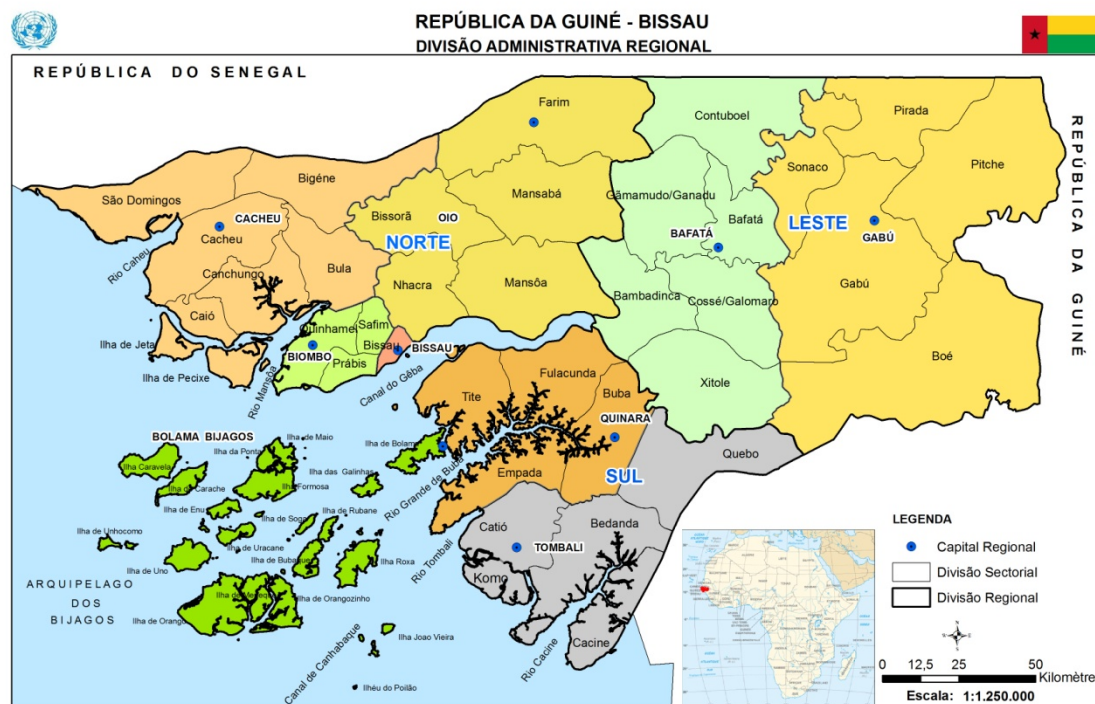

National Victim Assistance Strategy

Guinea-Bissau has a small territory of 36,125 Km² with an exclusively agricultural economy and its estimated 1,50 million habitants. It is situated on the west coast of Africa, bordered by Senegal to the north, Guinea (Conakry) to the east and south, and the Atlantic Ocean to the west. **The last census of the population in 2009 revealed an average of 0,94% of the total population, which are bearer of deficiency, with a high rate of 1,25% in the Northern region and 1,75% in the Bijagos islands in the Southern region.**

National Victim Assistance Strategy

Little progress overall has been made in improving access and quality of assistance to survivors in Guinea-Bissau in recent years due to lack of funds and of Government support.

- few facilities near mine-affected and battle areas;
- emergency transportation was almost non-existent;
- very limited services were further hampered by a lack of communication mechanisms and roads/transport.

In previous years, Guinea-Bissau efforts to coordinate victim assistance were largely stymied by a lack of national or international interest and resources.

National Victim Assistance Strategy

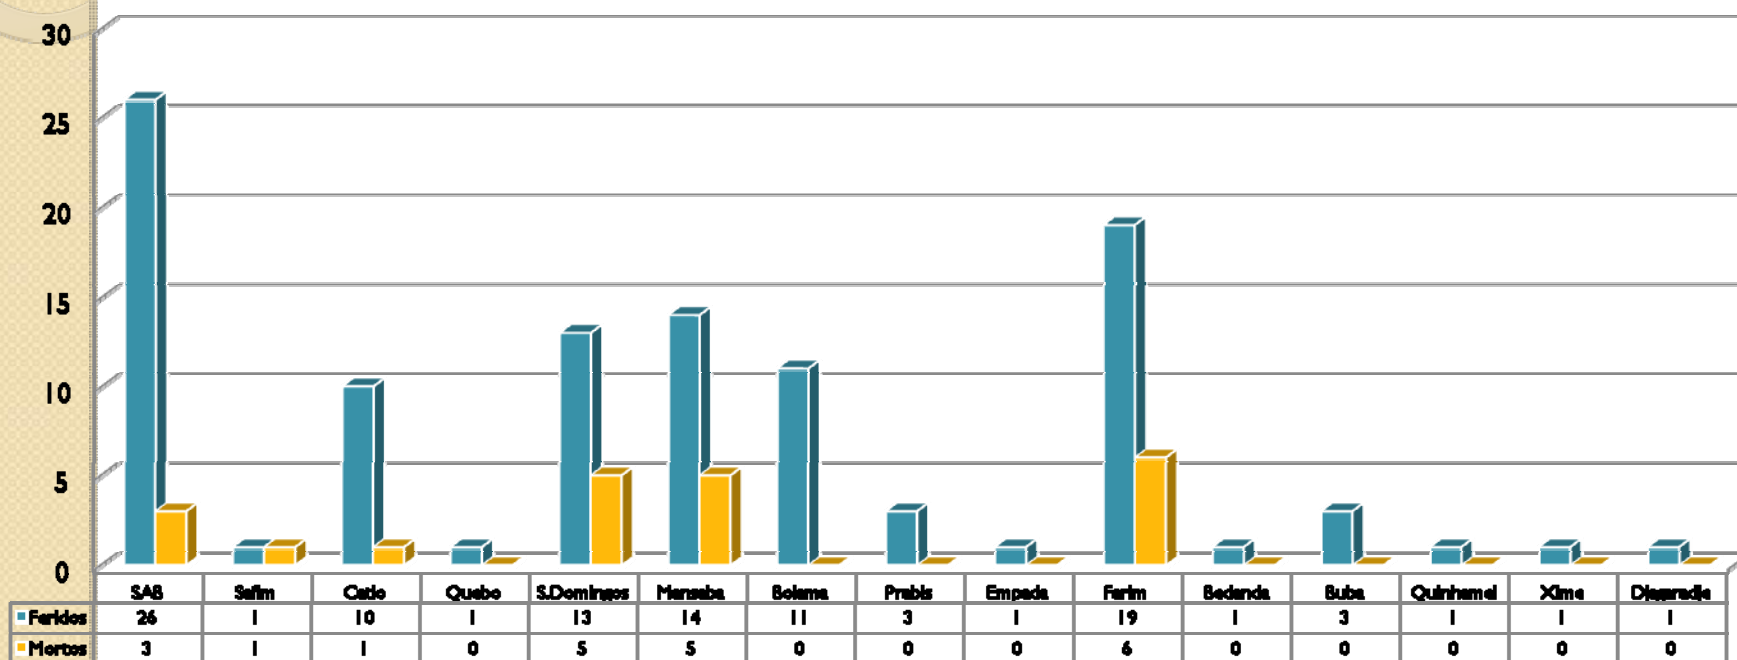

Victims Status

- There were a total of 1,518 casualties from mines/ERW recorded by CAAMI dating from 1963 through June 2012, 60% physical and sensorial permanent injury, 40% are amputated.
- The total number of mine/ERW survivors is estimated to be about 1,400 (93%). Some of these may have already died, but it is likely there are many more unrecorded;
- Over 80 per cent of victims have been male. A vast majority were farmers while 19 % of the victims are women.
- All recorded casualties since 2006 have been caused by ERW.

National Victim Assistance Strategy

Breakdown of the number of Victims of Mines and Explosive (1,518) recorded between 2000 and June 2012 by sectors

Wounded (1,405) 93%

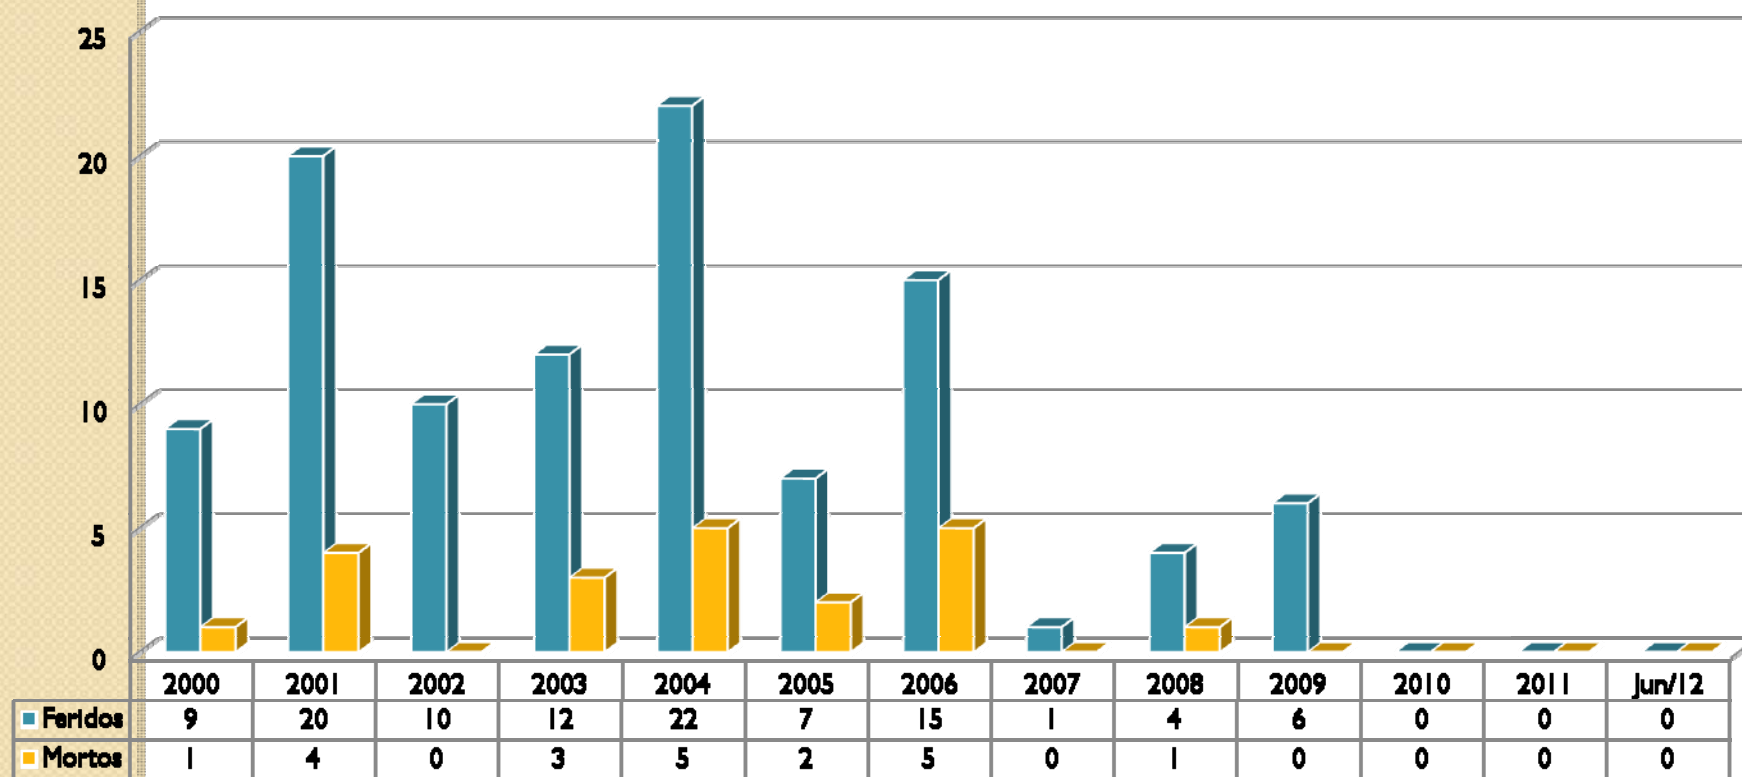

Dead (113) 07%

Breakdown of the number of Victims of Mines and Explosive recorded between 2000 and June 2012 by year

National Victim Assistance Strategy

The Vision of the VA programme in Guinea-Bissau is Equality of opportunity amongst all victims of war including the mine/ERW injured people, traffic injured amputated, diabetes, cancer, polio, etc.

- Its Mission is to promote the rights and dignity of persons with disabilities, assisting them to develop their livelihoods and interests, and bringing about their full participation in society.

-Article 5 of the Constitution of Guinea-Bissau prohibits discrimination against persons with disabilities, but implementation was weak. There was no law mandating access to public buildings and very limited efforts were made to ensure access to buildings or streets. As of November 2011, Government approved the Convention on the Rights of Persons with Disabilities which is currently at the National Assembly for approval.

National Victim Assistance Strategy

• Main objectives for a comprehensive Victim Assistance Strategy in Guinea-Bissau

- Establish a coordination mechanism on victim assistance in the country;
- Elaborate and implement a new approach on victims data collecting system to update in a more comprehensive breakdown the casualty data and define a comprehensive/realistic VA strategy;
- Use of data collection gathering sources and methods;
- Strengthen a comprehensive victim assistance programme by supporting already existing initiatives and programmes (International Red Cross ICRC- CRM);

National Victim Assistance Strategy

Main objectives for a comprehensive Victim Assistance Strategy in Guinea-Bissau

- Enhance and facilitate the employment of landmines survivors at the national institutions and in the other national and international organisations;
- Promote, distribute and advocate largely on the Convention on the Rights of Persons with Disabilities;
- Increase donors interest and resource mobilization for victim assistance programmes;
- Evaluating the use of disseminated data by the stakeholders;
- Monitor and continue the efforts engaged by CAAMI in 2009 for Mine survivors to be eligible for pensions for persons with disabilities from the Ministry of Social Solidarity and Poverty Reduction (MSSPR),

National Victim Assistance Strategy

• Main objectives for a comprehensive Victim Assistance Strategy in Guinea-Bissau

- In March 2011, the *Centro de Reabilitação Motora (CMR)* was officially inaugurated and re-opened in Bissau to serve as the main physical rehabilitation center for the country. The renovation of the center received support from Economic Community of West African States (ECOWAS) and ICRC.
- There is a need to continue strengthening the capacity of the CMR in order to better respond to the needs of the population bearer of deficiency.

National Victim Assistance Strategy

Establish an effective victim assistance programme in Guinea-Bissau

Action	Partner

National Victim Assistance Strategy

Guinea-Bissau target on VA (National poverty Reduction Strategy/DENARP II 2011-2015) :

The equal opportunity for rehabilitation, rehabilitation and reintegration of ALL victims (victims of war and mines/ERW included) and their full participation in the socio-economic reconstruction to the country as an actor for development, and thus re-establish their rights and dignity.

National Victim Assistance Strategy

Landmines

Civil war may be over in the hearts of the people of Guinea-Bissau but landmines are still a part of daily life.

Thank you for your attention and kind support
