CONVENTION CENTER

The Mine Action Information Centre at James Madison University has developed a catalog of low-cost tools for the use of landmine victims.

The Adaptive Technology Catalog was released last Friday, Nov 15. ~~and~~ It ~~was~~ is the product of a partnership with a Canadian NGO Project Associates and sponsored by the U.S. Department of State.

The ~~is~~ catalog showcases many tools which have been adapted for use by physically handicapped persons. It is organized into chapters based on economic sectors. Each device has a picture, cost, and company which manufactures it.

We believe that donors, managers, and planners can use this catalog ~~to~~ as a practical way to ~~get~~ <sup>prepare</sup> disabled workers ~~back~~ for productive and positive employment.

JMU <sup>asks</sup> ~~requests~~ ~~the~~ that ~~feedback~~ feedback, comments and requests for the catalog be made directly from the JMU MAIC.
