

**Socio-economic
inclusion of persons
with disabilities**

1

What is inclusion?

The Inclusion house

Quick definition of inclusion

Inclusion is a **rights based approach to programming**

Promoting

Participation

Accessibility

Mainstreaming

of persons with disabilities

**in order
to
achieve**

**Equality, Non-discrimination,
voice, choice and autonomy...**

for all

2

Pillars of inclusion

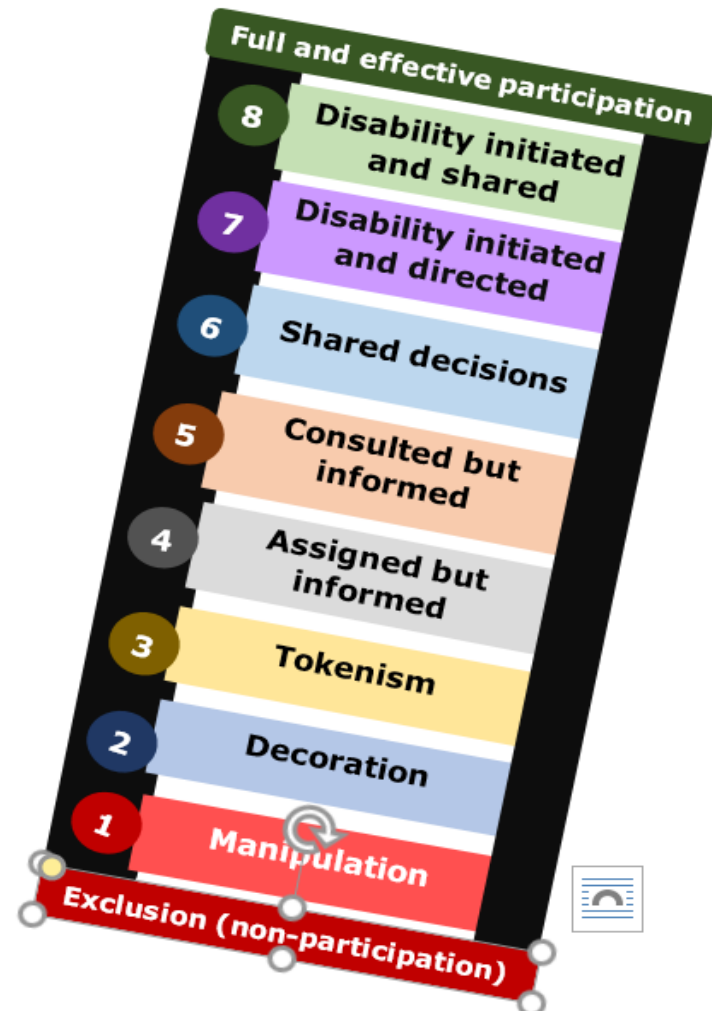

2.1 Participiaption

Adapted from: Roger Hart's Ladder of Young People and Participation (1992)

The lowest level is exclusion while the highest level is Full and effective participation.

Manipulation is the lowest rung of the participation ladder while Disability initiated and shared initiatives is the highest.

Note: Participation of persons with disabilities in processes should be **full and effective** participation; **not** *manipulative, decorative, tokenistic*.

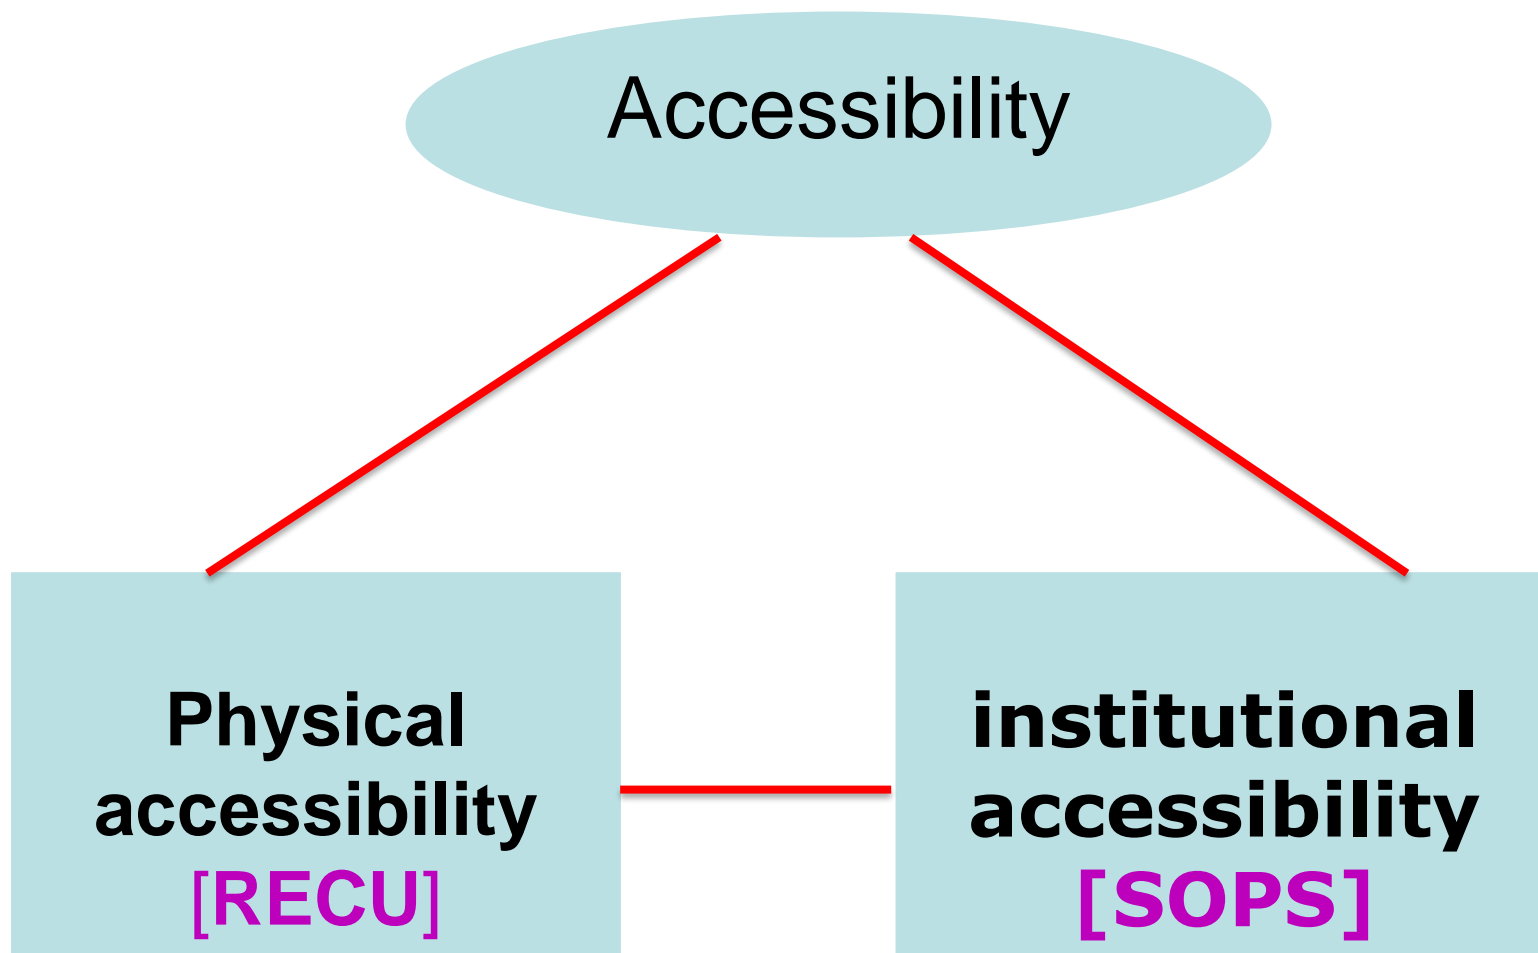

2.2 Accessibility

**Accessibility is ...
Ease of perception,
understanding and use.**

The sign on the left is the
'Universal sign of accessibility'
and not the
'disabled sign'

Forms of accessibility

Physical Accessibility:

This is based on the **RECU** principle meaning:
Reach, **E**nter, **C**irculate in and **U**se the
facilities in the built environment.

Example: Ramp

Ensuring physical accessibility

First step is to conduct an accessibility audit.

2.1 Reaching the hospital		Focus persons with reduced mobility
Findings		
 <p><i>Pic:</i> Entrance at the hospital gate.</p>	a) The hospital is situated 350m from the main motor road and is accessible by public taxi, motorbike and private means. The signpost at the main road is accessible.	 ✓
	b) There is no hospital signage outside the gate and the gate colour does not contrast to that of the pillars.	 ✓
	c) The slope for the main gate is steep (8.6%) similar to that of the pedestrians (8.7%).	 ✓
	d) There is a signboard showing various units in the hospital located in the lawn after the entrance. The arrows to this signboard are miniature and the writings on it correspond to the 47 mark of the indicative chromatic contrast chart.	 ✓
		 ✓
Recommended standards		
<ol style="list-style-type: none"> Should be accessible by public transport. The building should be clearly marked at the entrance. Any road crossings and or bus stops should be clearly marked as such. 		 ✓
		 ✓
		 ✓
		 ✓
		
		Access average
		33%

Institutional Accessibility:

This is based on the <u>HOPS</u> principle	<u>H</u>uman_resource	<ul style="list-style-type: none">• Training of staff on DID• Focal DID persons• Inclusive recruitment and retention practices• DID readiness for the Management.
	<u>O</u>rganisational Systems	<ul style="list-style-type: none">• Policies (Inclusion, gender, safeguarding etc.)• Financing• Disaggregation of data• Communication• Budgeting etc.
	<u>P</u>rogramming	<ul style="list-style-type: none">• Participation of persons with disabilities• iPCM• Networking and advocacy.• Support services
	<u>S</u>ervice delivery	4As&Q <ul style="list-style-type: none">• Availability of services.• Affordability of services.• Accessibility of services.• Acceptability of services and• Quality of services.

Different accessibility support needs

Examples of different
support needs –
**physical/
technological/ policy/
legislative/ social?**

Universally
designed
consumer
products

Assistive &
mobility aids

Assistive
technology

Live
Assistance

Sensitized
service
providers

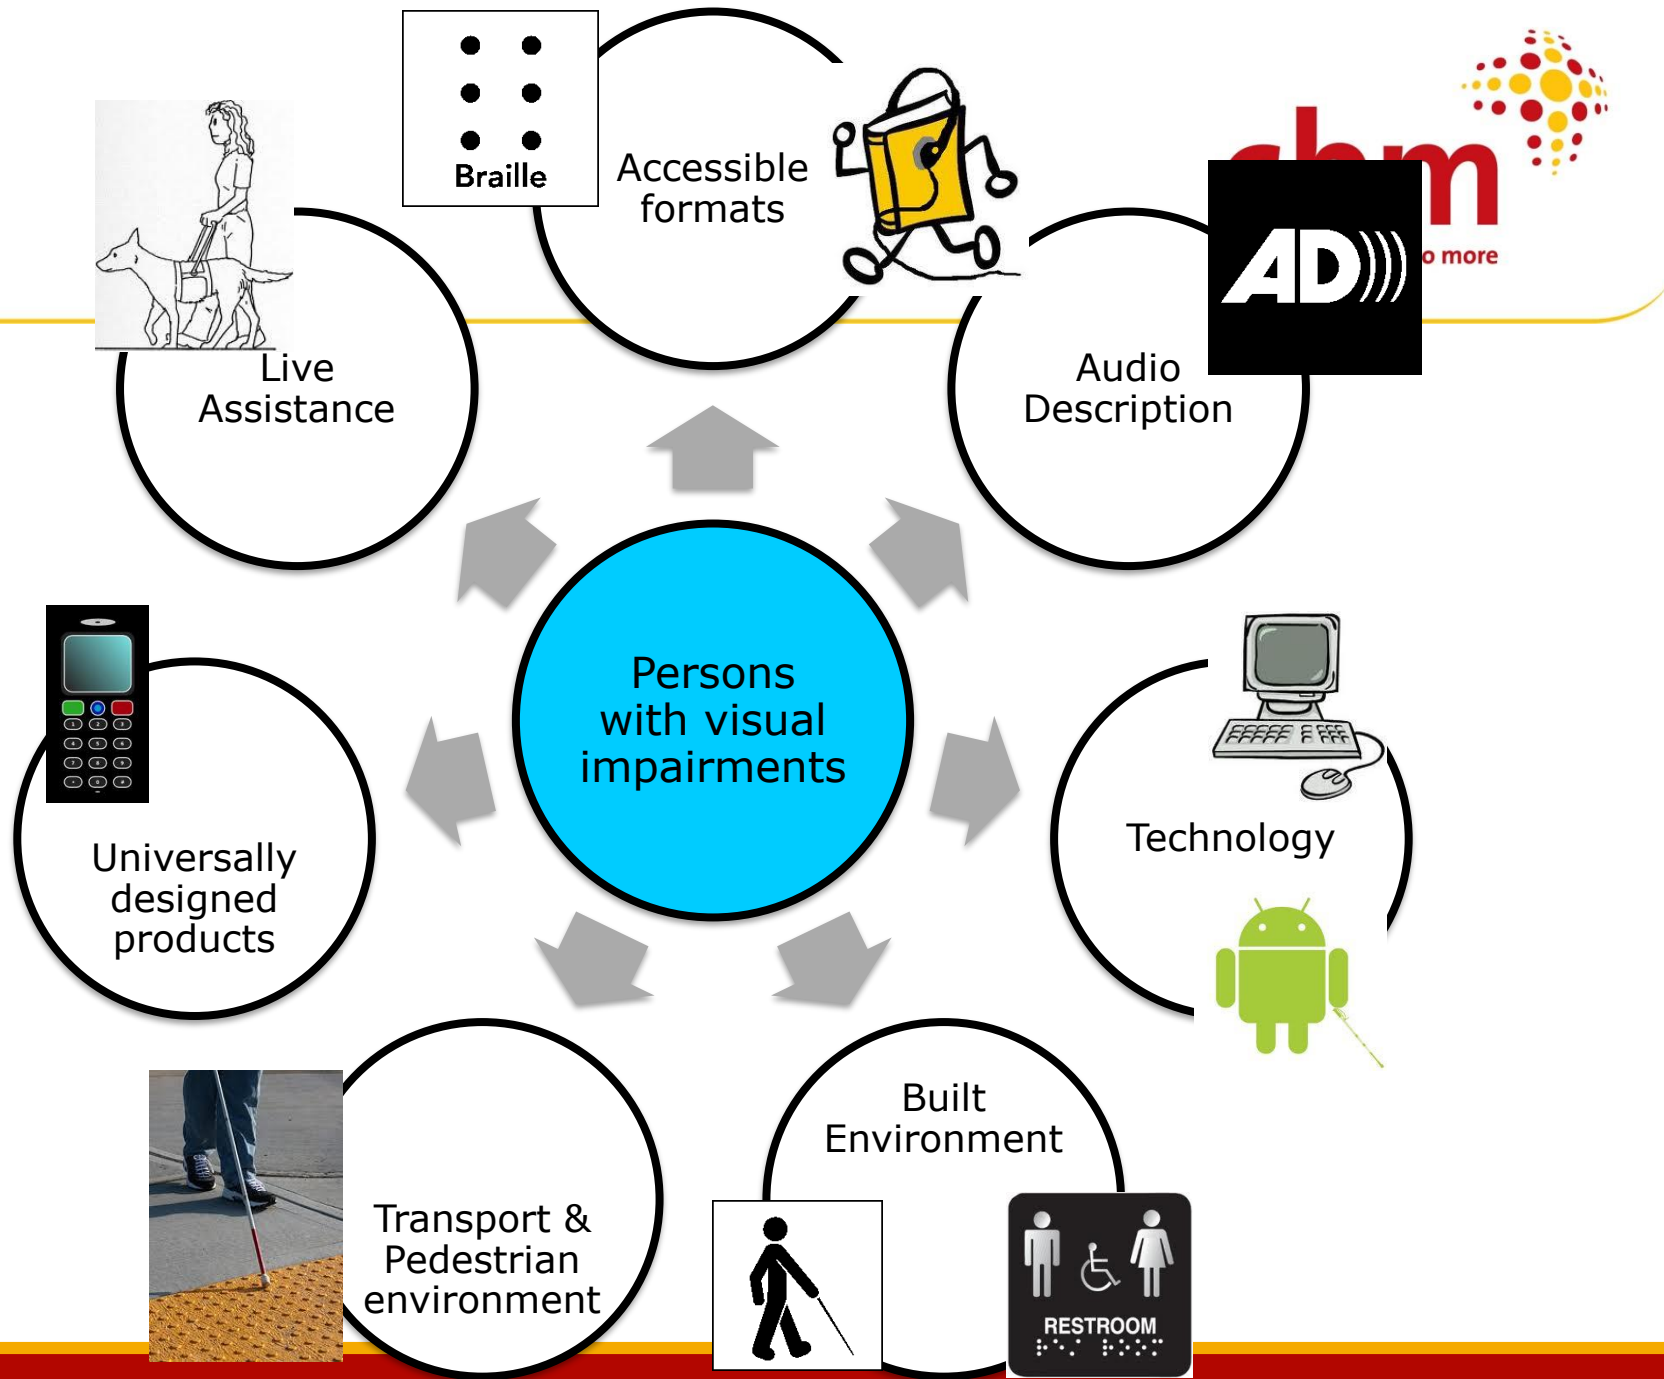

Public
transport &
pedestrian
environment

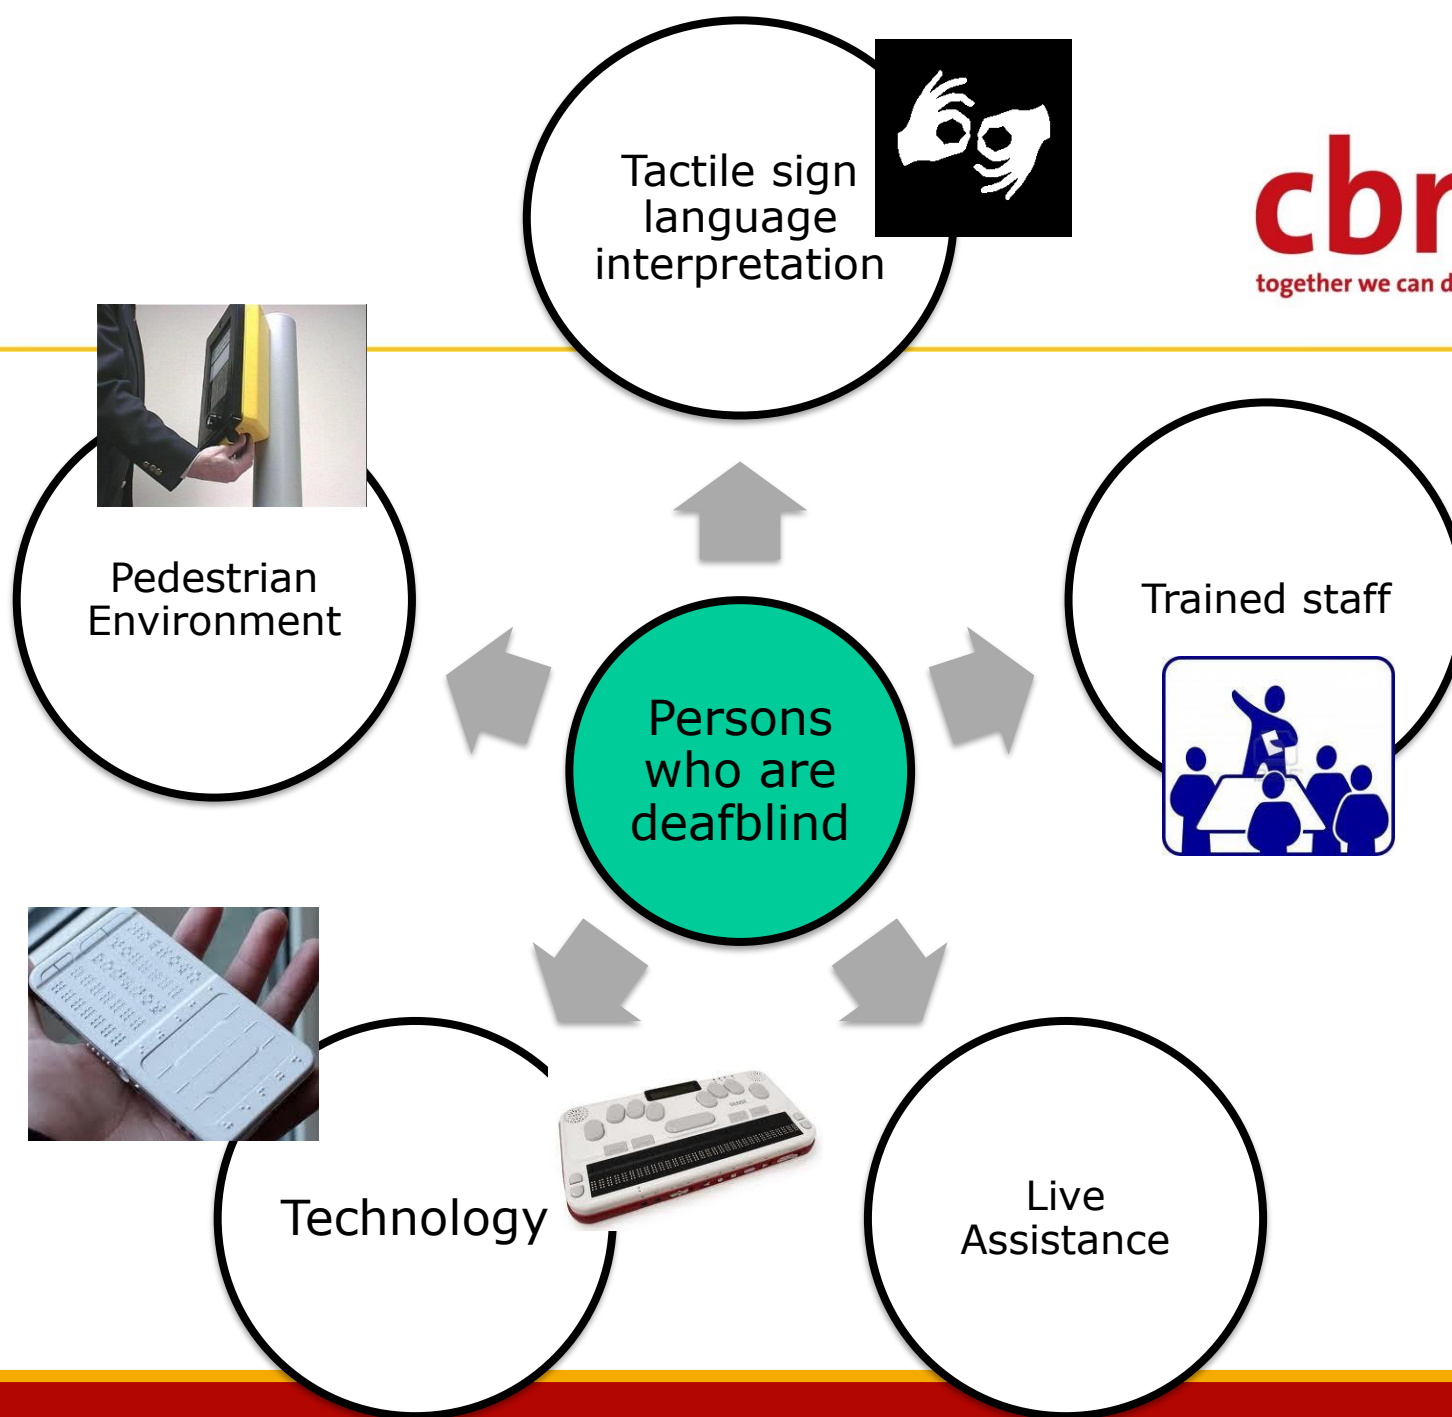

Built
environment

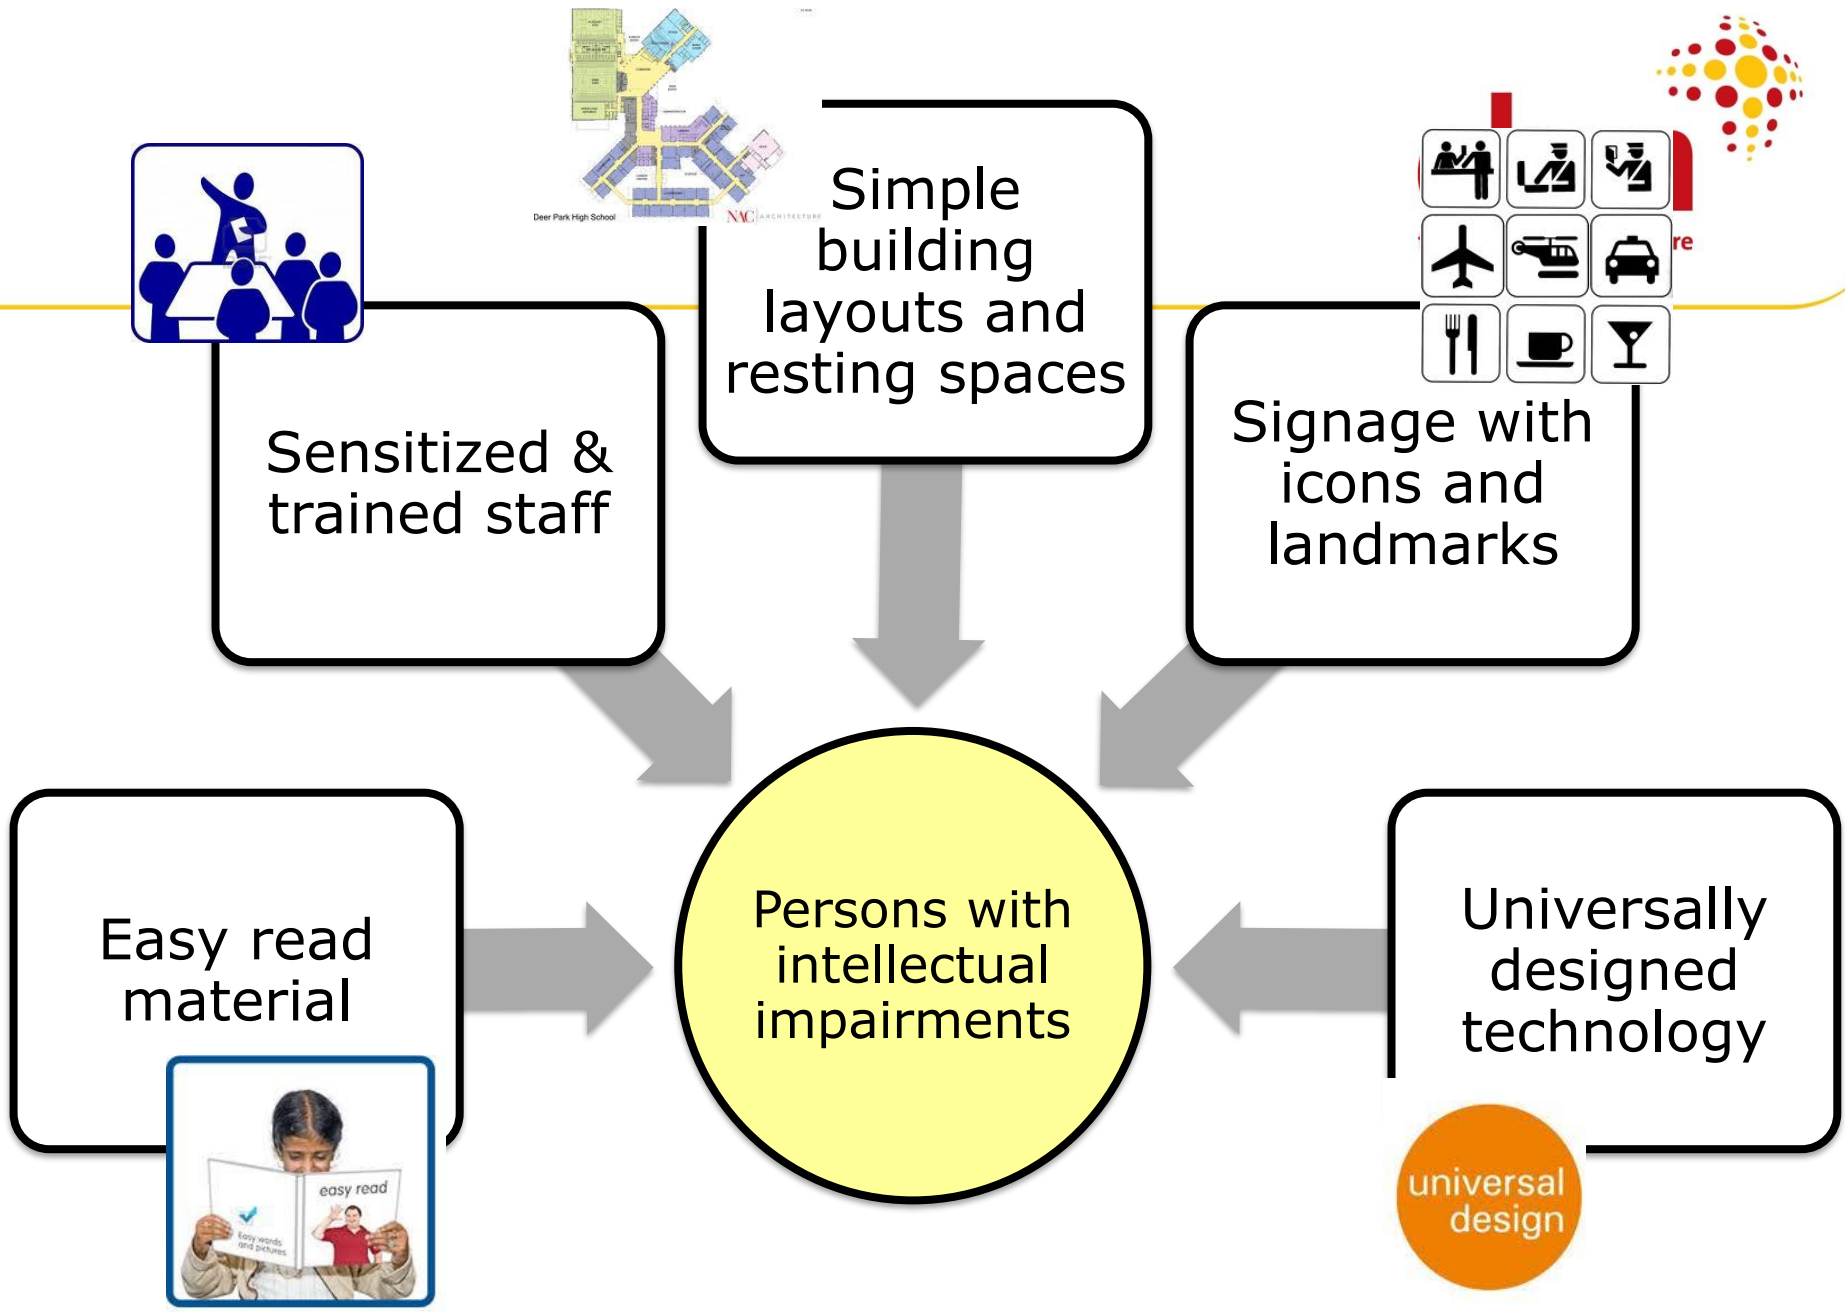

Persons
with
physical
disabilities

together we can do more

Good
signage &
Landmarks

Sensitized &
trained staff

Persons with
Psycho-social
impairments

Simple
building
layouts

Uncluttered
sober spaces
with break
out areas/
quiet space

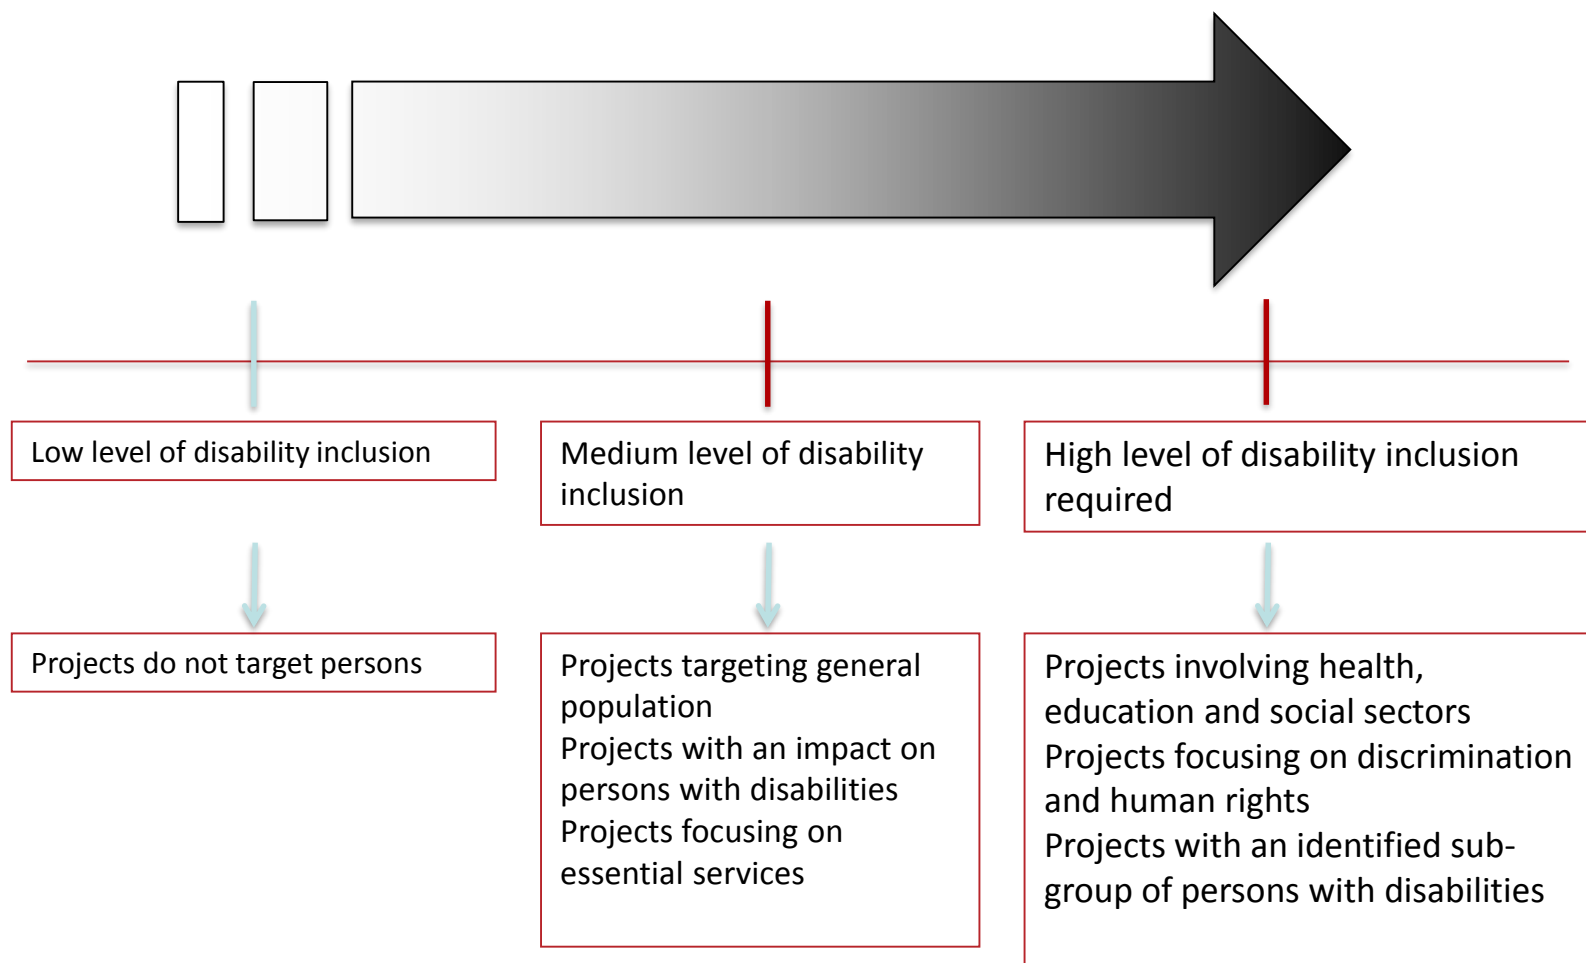

2.3 Mainstreaming

Involves;

- Ensuring the **rights** of persons with disabilities are mainstreamed in all sectors of society.
- Ensuring persons with disabilities can **fully participate** in and **access**; health care, education, employment, recreation, social services etc.
- **Assessing the implications** for persons with disabilities of any planned action including legislation, policies and programmes.
- Ensuring persons with disabilities are **integrally involved** and **their perspectives represented** in the design, implementation, monitoring and evaluation of all actions in all sectors of society.

Different degrees of disability mainstreaming

Examples of mainstreaming approach in Education

- 1) Increasing physical accessibility of learning institutions.
- 2) Training staff
- 3) Providing support services
- 4) Making education affordable

Persons with disabilities have sustainable access to education on an equal basis with others.

**Thank
you**
